## AWAKEN GOALS

In 2016, Awaken opened a drop-in center three days a week. Our Drop-In is an important survivor run program at Awaken. It is the first point of contact for many victims of trafficking in our community. After recognizing the increased need, Awaken plans to open our Drop-In five days a week.

Awaken began working with minors in 2017. Since then, over 100 children have been provided case management, therapy, mentorship, access to our education center and more. Our goal this year is to continue expanding services, therapeutic groups and an after school program to help them heal past their trauma and reclaim their childhood.

In 2019, Awaken opened a transitional house for women exiting the commercial sex trade. We

have housed 15 women since its opening for an average of 6 months. Housing remains a vital need for those exiting the sex trade. We hope to offer many more housing opportunities for the women and children in our community who have been trafficked.

## COMMUNITY GOALS

There is no safe way for prostitution to exist, yet in 1971 Nevada allowed counties to legalize prostitution. After 50 years, we are confident this has created great harm to our state and the women and children within it. Our dream is for people to take a stand against Nevada's legal sex trade. We desire engagement with our community, donors and survivors to make Nevada safe for all women and children.
