MEMORANDUM

August 30, 2017

To: Nevada Board of Wildlife Commissioners, County Advisory Boards to Manage Wildlife, and Interested Publics

From: Jon Sjöberg, Administrator, Fisheries Division

Title: **Commission Regulation CR 18-01 – Fishing Seasons for the period March 1, 2018 through February 29, 2020 – For Possible Action/Public Comment Allowed**

Description: The Commission will consider adopting Commission Regulation 18-01 for the next two years fishing season.

Summary:

The Nevada Department of Wildlife is pleased to present proposed fishing season and regulation recommendations for the March 1, 2018 through February 29, 2020 period (CR 18-01). These recommendations are scheduled to be reviewed and adopted by the Board of Wildlife Commissioners in regular session on September 22-23, 2017 in Las Vegas. This memorandum presents a synopsis of county specific recommendations including descriptions and rationale for those changes.

There are no changes proposed for waters in the following counties:

MEMORANDUM

Date: August 30, 2017

To: Nevada Board of Wildlife Commissioners

From: Jon C. Sjöberg, Chief of Fisheries

Subject: The Status of Nevada's Fisheries 2017

A handwritten signature in black ink that reads "Jon C. Sjöberg".

2017 has represented a unique opportunity for Nevada's fisheries and aquatic resources. After multiple years of significant to severe drought across much of our state the exceptional winter of 2016-2017 has restored streamflows and increased storage levels to lakes and reservoirs, particularly in northern and central Nevada. Although there are exceptions to this trend in some places, we can look forward to increased opportunities for angling and the ability to enhance many important fisheries through improved conditions and the restoration of both cold-water and warm-water fisheries that were impacted by drought conditions. Extreme river flows in western Nevada through mid-summer delayed some trout stocking programs, but improved reservoir conditions did allow us to increase stocking of warm-water game fish species and we hope to continue these efforts in the coming years.

In much of the upper Colorado River Basin winter snowpack was only average at best and will continue to affect Lake Mead. However, this was still an improvement from the past several years and current projections indicate that the reservoir will remain relatively stable through at least summer 2019. NDOW's surveys have also indicated that 2017 was an excellent year for production of threadfin shad and other forage fish, which should benefit striped bass and other game fish species.

Trends in recent climate change affecting Nevada and much of the west are likely to continue in unpredictable ways that may affect our fisheries, particularly related to warmer spring-time temperatures that affect the timing of snow melt and higher average temperatures year around. However, it's also important to remember that climate conditions in the Great Basin are highly variable and long-term forecasts are particularly difficult for predict precipitation and winter snowpack. Current projections suggest a return to more average conditions in the winter of 2017-2018 but even that will allow us to continue to capitalize on our abundant 2017 water year.

Reflecting the current conditions of Nevada's streams, lakes and reservoirs, NDOW has not proposed any substantive changes to fishing regulations for the 2018-2020 period. The only proposed change is to closed waters in Churchill County to reflect consistency with existing Federal regulations on Stillwater National Wildlife Refuge which have been in place for a number of years. We are hopeful for and look forward to improved water conditions in future years which will increase opportunities to manage and enhance our many and varied fisheries across the state to the benefit of Nevada's anglers.

PROPOSED CHANGES

CHURCHILL COUNTY

All regulations in Churchill County are proposed to remain the same with the exception of the following (changes are delineated in boldface green type):

Stillwater National Wildlife Refuge

Existing Regulation:

CLOSED WATERS:	Lahontan Dam spilling pool (bowl) on the Carson River below Lahontan Dam
----------------	--

Proposed Regulation:

CLOSED WATERS:	Lahontan Dam spilling pool (bowl) on the Carson River below Lahontan Dam. All waters within the boundaries of the Stillwater National Wildlife Refuge.
----------------	---

Description and Rationale:

The Fish and Wildlife Service closed the Stillwater National Wildlife Refuge to fishing in August 2004 due to the high methyl-mercury concentration in fish. Although the area has received a very small amount of fishing prior to the current closure, anglers may be confused on whether it is currently open to angling when it is not posted as closed in the State's regulations. Listing the refuge as closed to fishing in the State's regulations lends support to our Federal partner and helps ensure the public is aware of the restriction.

**STATE OF NEVADA
BOARD OF WILDLIFE COMMISSIONERS**

**FISHING SEASONS
CR 18-01**

The Board of Wildlife Commissioners, under the authority of 501.181 of the Nevada Revised Statutes, does hereby adopt the following regulation for the management of the fisheries resource:

2018/2019 FISHING SEASONS
MARCH 1, 2018 THROUGH FEBRUARY 29, 2020

LIMITS

“Limit” means the maximum number of game fish that may be lawfully taken and reduced to possession by a person in one day. The limit includes fish caught in Nevada which have been processed or preserved and are stored at any location. Fish that are caught and immediately released back to the water alive are not considered to be reduced to possession or part of the limit.

A person shall not reduce game fish to possession if he already has the number of that fish in possession which equals or exceeds the limit of the water being fished.

General limits are listed by county as all waters, all lakes and reservoirs or all streams and rivers. Exceptions to general limits and special regulations are listed by individual water.
