Figure 4.5

### Water Level and TCE Concentration in Deep Zone Wells During December 2017

#### Sample Results

- Detected > 0.50 µg/L TCE
- Values plotted only for wells that were sampled. Data from production wells are from samples collected under pumping conditions. Estimated values for wells that were sampled less than 0.50 µg/L are estimates. Estimates are either provided by the lab or represent averages of multiple samples taken at different times.
- ND Below Analytical Reporting Limit
- TCE Concentration Contours
- > 0.50 µg/L > 10 µg/L  
> 1.25 µg/L > 20 µg/L  
> 2.5 µg/L > 40 µg/L  
> 5 µg/L > 80 µg/L
- Water Level Elevation Contours  
Deep Zone Wells Only  
Fest Above Mean Sea Level - Dashed Where Approximate or Estimated
- Groundwater Flow Direction
- Contaminant Boundary
- Creek
- Ditch

**NOTES:**

The scale and configuration of all information shown herein are approximate and are not intended to be a guide to actual survey work. This map is not provided without prior written permission from the Washoe County Community Services District.

Contours drawn using primarily September 2017 water level and TCE data. Contours may change as information from new surveys becomes available. Contours associated with pumping or recharging wells are schematic and may not be representative of actual contours.
