**Subject:** Second addendum to original staff report for Special Use Permit Case No. WSUP17-0014 (Gail Willey)

Two new exhibits have been received since yesterday and are attached to this addendum to Special Use Permit Case No. WSUP17-0014 (Gail Willey.) The additional documentation includes:

- **Exhibit C-2:** Additional Public Comment Letters
- **Exhibit G:** Applicant Response to Staff Report and CAB meeting; Trade Area Analysis

Due to a request from Washoe County's water rights manager, staff also requests that the following condition of approval be added as 1(t):

- t. All water rights, including surface water rights, must have appropriate permits and approvals by the State Engineer.

---

Kelly Mullin,

As a resident of Pleasant Valley for many years, I'm very concerned and troubled about the possible granting of a special use permit to the Gail Willey Landscaping and rock hauling operation. The residents of this beautiful valley live here because we greatly value the peaceful rural environment. Granting a permit for a heavy industrial use operation is against everything this area is meant to be. Please forward this letter to all involved in this process and add my name to those very much against this permit. Thank you for your consideration in this matter.

---

Attention: Kelly Mullin

A resident of Pleasant Valley, I adamantly oppose "heavy industrial use" in this, our residential neighborhood. The increase in traffic, specifically heavy truck traffic and the noise that accompanies such traffic, is unacceptable in this residential area. Please give consideration to those of us already living here and help ensure our continued safety and quality of life.

Zina M. Zinn

RE: Responses to CAB/NAB Comments and Anticipated Trade Area Analysis

To Whom it May Concern:

This firm represents Gail Willey Landscaping and Colorock ("GWL") who is seeking a special use permit to move an existing wholesale nursery from Reno to a new location in Pleasant Valley located at 134 Andrew Lane, APN: 017-430-01 (the "Subject Property"). The Subject Property is located in the South Valleys Area Plan and has a regulatory zone of General Rural ("GR").

By way of background, GWL initially began operating as a wholesale nursery which provided plant materials and landscaping materials—including rocks, stone, and boulders—to smaller landscaping companies and individuals. Since that time, the demand for water-efficient landscaping materials has increased drastically due to severe drought in the southwestern United States. Similarly, many cities and counties have adopted policies and development code language that promote the practice of xeriscaping and rockscaping, both of which emphasize the use of rocks, stone, and other drought-resistant materials. The Washoe County Development Code ("WCDC") includes water conservation and landscaping provisions. See Article 412 ("LANDSCAPING"); see also § 110.412.20 (Water Conservation). Further, the Washoe County Code encourages "the use of climatic adaptive planting material" (§ 110.412.60(a)) and promotes "resource-efficient landscaping for the conservation of water and other natural resources" (§110.412.20). Moreover, the Washoe County Code includes "decorative rock or other appropriate inert materials" in its definition of "Ground Cover." § 110.412.60(j)(2)(emphasis added).

Fulfilling local and state water and landscaping policies now requires landscaping and architectural design that emphasize the use of climate-appropriate plants and decorative rock in lieu of less efficient plants, turf and water features. These policies have drastically increased the demand for decorative rock and other ground cover in both residential and commercial landscaping. For example, Clark County has removed or replaced nearly 4,000 acres of

traditional lawn space since 1999 in an effort to increase water efficiency.<sup>1</sup> In response to these market forces, businesses like GWL now offer more landscaping material than ever before.

## **I. Staff Report Findings and Responses**

The Staff Report recommended partial approval of the special use permit with conditions based on an analysis that requires fragmenting GWL's services and products into three different use categories: (1) Nursery Sales — Wholesale; (2) Wholesaling, Storage and Distribution — Heavy; and (3) Construction Sales and Services. Accordingly, the Staff Report concluded that five of seven required findings favor approving the special use permit for GWL's wholesale nursery activities.<sup>2</sup> Staff Report at 26-27. Specifically, a wholesale nursery: (1) is consistent with the Master Plan and South Valleys Area Plan; (2) is suitable for the proposed site; (3) is not detrimental to public health, safety and welfare or the character of the surrounding area; (4) has no effect on a military installation; and (5) is consistent with the South Valleys Area Plan Character statement. Staff Report at 26-27. However, the Staff Report found that GWL's Colorock activities failed to satisfy any of those same findings. Accordingly, the Staff Report recommended approval of the wholesale nursery activities and denial of the Colorock activities.

### **A. Use Designation**

Absent the Staff Report's unnecessary deconstruction of GWL's services, the Staff Report's conclusion would have been to the effect that five of seven required findings favor approving the special use permit while only two were conditioned on approval from other agencies. Staff Report at 26-28. Indeed, this is the proper conclusion because all of GWL's uses, including Colorock's activities, fall squarely within the "Nursery Sales — Wholesale" use designation.

#### **1. GWL's use is not construction sales and services**

The Staff Report relies on GWL's website—not its actual services—to conclude that its use qualifies as "Construction Sales and Services." GWL's website describes the business as a "design/build construction firm" and "landscaping company" that designs and builds "all types of landscapes and hardscapes" which include the design and installation of landscaping features such as "pavers; patios; trees; shade structures; retaining walls; rock beds; gardens; rock gardens; rock walls; and water features." Staff Report at 14.

The Washoe County Code defines "Construction Sales and Services" as:

---

<sup>1</sup> See John M. Glionna, *Amid drought, the West is no place for a lawn, as Nevada has learned*, LOS ANGELES TIMES (May 1, 2015), <http://www.latimes.com/nation/>.

<sup>2</sup> The only findings that did not favor a special use permit for a wholesale nursery were contingent on further approvals. Adequate "Improvements" is conditioned on approval from reviewing agencies and "Air Quality" is conditioned on approval from the Washoe County Health District's Air Quality Management Division. Staff Report at 26-27.

establishments or places of business **primarily engaged in construction activities and incidental storage, as well as the retail or wholesale sale from the premises, of materials used in the construction of buildings or other structures.** This use type does not include retail sales of paint, fixtures and hardware, or those uses classified as one of the automotive and equipment use types. This use type does not refer to actual construction sites. **Typical uses include tool and equipment rental, or sales and building material stores.**

WCDC § 110.304.25(j) (emphases added).

Although the term "construction" is used throughout the WCDC, it is not specifically defined. However, the term is often used in reference to residential and commercial construction projects.<sup>3</sup> Despite the description used on GWL's website, the company is not **"primarily engaged in construction activities and incidental storage . . . of materials used in the construction of buildings or other structures"** rather, GWL provides landscaping services which include the limited construction of landscape-related features (*i.e.* rock walls, rock beds, rock gardens, patios, trees, pavers, shade structures, and water features) and incidental to that service is the storage of *landscaping materials* (*i.e.* ground cover). These are the very same landscaping services offered by other landscaping companies that describe them in the same manner.<sup>4</sup> The description of the services offered does not change the fact that GWL does not engage in tool and equipment rental, or sales and building material stores. Indeed, GWL does not offer equipment rental, does not sell or rent construction equipment, and does not store construction materials—GWL's services are limited to *landscaping* materials. Accordingly, GWL's use cannot reasonably be categorized as "Construction Sales and Services."

## 2. **GWL's use is not wholesaling, storage and distribution**

The Staff Report concludes that GWL's activity is considered "Wholesaling, Storage, and Distribution — Heavy" based on activities that are merely incidental to the sale of landscaping and nursery items. The Staff Report notes that Colorock sells rock, gravel, sand, base and mulch and stores those items in open-storage bins. Staff Report at 14. Additionally, because Colorock uses large trucks for its landscaping services, it also offers "boulder pickup; snow removal with loaders and skid-steers; transporting of equipment up to 45,000 pounds; using a grapple truck to place boulders; and trucking services to deliver . . . boulders and construction

<sup>3</sup> For example, a "Construction Yard" includes temporary buildings, structures and storage areas "supporting **residential development** and major construction." WCDC § 110.310.15(e) (emphasis added). Similarly, the WCDC describes "**House Construction Factories.**" *Id.* at § 110.310.30 (emphasis added).

<sup>4</sup> See *e.g.* Signature Landscapes, <http://www.signaturelandscapes.net/grow/landscape-design-construction/> (offering "Landscape Design & Construction"); Reno Green Landscaping, <http://renogreen.com/services/commercial-services/design-and-installation/> (offering "New Construction and Installation").

materials." Staff Report at 14-15. Finally, "Colorock also allows for dumping of landscape and construction debris at their business location." Staff Report at 15.

The WCDC defines "Wholesaling, Storage and Distribution — Heavy" as:

establishments or places of business **primarily engaged in wholesaling, storage and bulk sale distribution including, but not limited to, openair handling of material and equipment other than live animals and plants.** The following are wholesaling, storage and distribution use types:

...

(2) Heavy. **Heavy refers to distribution and handling of materials and equipment. Typical uses include monument sales, stone yards or open storage yards.**

110.304.30(l)(2)(Emphases added).

GWL is not engaged in the "Wholesaling, Distribution, and Storage." As an initial matter, the sale of plants, flowers and related nursery items requires trucks and trailers of varying sizes and outdoor open-storage bins due to the large variety of landscaping materials. Generally, the only difference between retail and wholesale is whether the nursery items are purchased by a homeowner or a third-party—not necessarily the size of the materials or the method of storage or delivery. The sale and delivery of boulders, rock, gravel, sand, base, and mulch is merely the sale of "**decorative rock or other appropriate inert materials**" or "Ground Cover" and "**other related nursery items**" as defined by the WCDC. §§ 110.412.60(j)(2); 110.304.25(x) (emphasis added). The only commercially sensible way to store such materials is in open-storage bins. Further, because the winter is the slow-season for the sale of nursery and landscaping materials, Colorock provides a landscaping service through snow removal. This activity takes place away from the Subject Property and has no impact on the neighboring parcels. Similarly, transporting equipment is incidental to GWL's primary business and takes place away from the Subject Property. Third, allowing dumping of landscaping and landscape construction materials on site is merely incidental to the sale of *new* nursery items and landscaping materials. Moreover, by offering this service Colorock reduces the number of trips that local landscaping providers must make to conduct their business, thereby reducing the number of trips to and from landscaping sites throughout northern Nevada. Consequently, GWL's use cannot reasonably be defined as "Wholesaling, Distribution, and Storage."

### 3. GWL's use is nursery sales

As described above, GWL is a nursery and landscaping business that, in response to market forces and state and local policies encouraging the use of climate-appropriate landscaping materials, provides "**decorative rock or other appropriate inert materials**" as "Ground Cover" as defined by WCDC. § 110.412.60(j)(2) (emphasis added). Indeed, the GWL's

services fulfill Washoe County's desired goal of encouraging climate-appropriate landscaping in the form of xeriscaping and rockscaping.

The WCDC defines "Nursery Sales" as:

the sales of plants, flowers **and related nursery items**. The following are nursery sales use types:

...

(2) Wholesale. Wholesale refers to **wholesaling** of plants and flowers, with incidental retail sales.

Typical uses include wholesale nurseries.

WCDC § 110.304.25(x) (emphasis added).

Although the WCDC does not define "related nursery items," its policies and priorities contemplate and promote the use of rocks, gravel, boulders, and other inert materials in landscaping. Many other southwestern governments have adopted similar policies in response to prolonged draught. For example, the Gilbert, Arizona Unified Land Development Code (the "Gilbert Code") defines "Plant Nursery, Retail Sales" as "sales of plant materials, **landscape materials**, and fertilizer." Gilbert Code Glossary (emphasis added). Additionally, the Gilbert Code encourages "Desert landscaping," which it defines as "the installation of 'lush' desert landscaping through the use of low water-consumptive plants indigenous to this region." *Id.* at Article 11.1(E). The Gilbert Code further dictates that "[i]norganic ground cover, consisting of **decomposed granite, crushed rock, gravel, river rock and/or boulders**, shall be of sufficient variety in terms of color, texture, and materials to provide a pleasant and diverse appearance." *Id.* (Emphasis Added). Similarly, the Clark County Unified Development Plan ("CCUDP") defines "Plant Nursery" as "an establishment for the growth, display, and/or sale of plants, shrubs, or trees which may also include the accessory sale of materials and tools **such as decorative rock**." CCUDP Title 30.08-65 (emphasis added). Notably, the CCUDP includes landscape design objectives which emphasize "water conserving design." *Id.* at 30.64.030. Under the same chapter, under a section titled "Ground Cover" the Clark County Plan dictates that "[a]ny portion of a landscape area not planted **shall** be covered with **decorative rock, bark, mulch or other material suitable for reducing dust and evaporation**." *Id.* at 30.64-7 (emphasis added).

Similarly, the WCDC includes water conservation and landscaping provisions. See Article 412 ("LANDSCAPING"); see also § 110.412.20 (Water Conservation). Further, the WCDC encourages "the use of climatic adaptive planting material" (§ 110.412.60(a)) and promotes "resource-efficient landscaping for the conservation of water and other natural resources" (§ 110.412.20). Moreover, the Washoe County Code includes "**decorative rock** or other appropriate inert materials" in its definition of "Ground Cover." §110.412.60(j)(2)

(emphasis added). Thus, the WCDC contemplates and encourages the use of rock, stone and other inert materials in residential and commercial landscaping.

To be sure, GWL's sale of plants and flowers is explicitly included in the definition of "Nursery Sales." Additionally, the WCDC clearly contemplates the use of decorative rock, gravel, stone, boulders, and other "inert materials" in landscaping activities. Therefore, GWL's sale of such "inert materials" is clearly compatible with the current definition of "Nursery Sales."

#### 4. **Regardless of use category, GWL's use is consistent with the South Valleys Area Plan**

Many of the Staff Report's conclusions are dependent on categorizing GWL's use as either "Wholesaling, Storage and Distribution" or "Construction Sales and Services" neither of which is permitted in the GR zone. See WCDC Table 110.302.05.3. Indeed, the Staff Report concludes that those uses "are not allowed within the General Rural regulatory zone and do not meet several of the policies within the [South Valleys] Area Plan, especially with regards to the Character Statement." Staff Report at 26.

GWL's commercial use is consistent with other uses permitted in the GR zone with a special use permits and is significantly less intrusive than industrial uses permitted in the GR zone. For example, industrial uses permitted in the GR zone with special use permits include:

**Aggregate Facilities.** Aggregate facilities use type refers to the **extraction and processing of sand, gravel and rock from the ground.** Typical uses include **sand and gravel pit and ancillary uses such as concrete and asphalt batch plants**

**Mining Operations.** Mining operations use type refers to the **extraction and processing of rocks and minerals from the ground,** but excludes uses classified under the petroleum gas extraction use type. **Typical uses include the mining of precious metals and industrial minerals.**

**Petroleum Gas Extraction.** Petroleum gas extraction use type refers to **the extraction of oil and natural gas from the ground and the temporary storage of oil at the well site.** Typical uses include **oil and gas wells.**

Table 110.302.05.4; 110.304.30(a), (i), (j) (emphases added).

Thus, GWL's services are significantly less intrusive and noxious than industrial uses that are permissible in the GR zone. Moreover, as with any of these more intrusive uses, the Subject Property will be subject to rigorous conditions of approval by various state and local agencies. See Staff Report Exhibit A "Conditions of Approval".

Additionally, the Subject Property is located near other commercial uses. Approximately one mile away is a TrailersPlus dealership that sells cargo, utility, equipment, and ATV trailers of varying sizes<sup>5</sup> and an Anchor Storage facility.<sup>6</sup>

## II. SV.29.4 Anticipated Trade Area and Community Service Analysis

Pursuant to SV29.4 an applicant for a commercial use must "demonstrate that an analysis has been conducted that defines the anticipated trade area and demonstrates that the intended use is community serving." GWL's services are an integral part of the landscaping market in northern Nevada and the Subject Property will serve as a more centrally located and more easily accessible location for GWL's customers and community members.

GWL has a large and diverse customer base spread throughout the Reno-Tahoe area and much of northern Nevada. GWL serves hundreds of individual clients every year which includes private homeowners (Exhibit A; A-1) landscaping professionals, contractors, other commercial customers, and vendors (Exhibit B; B-1). As depicted in the trade map below, GWL's diverse customer base extends from the North Valleys south to Douglas County, west to Truckee, California, and as far east as Yerington and Fallon.

**Approximate Trade Area in Relation to Subject Property**

<sup>5</sup> <https://www.trailersplus.com/nevada/reno/>.

<sup>6</sup> <http://www.anchorstorage.net/>.

Despite the fact that GWL's customer base extends over a broad geographic area, the vast majority of GWL's customers are local. Accordingly, GWL's services have become a critical component of the Reno-Sparks landscaping community. Exhibit C. GWL's services are crucial to many small businesses based throughout Washoe County and specifically those located in and around the Reno-Sparks area.

The Subject Property will improve GWL's ability to serve the northern Nevada community in many ways. First, the subject property provides an opportunity for GWL offer additional plant-based nursery items. Second, the Subject Property is more centrally located in GWL's trade area. And third, the Subject Property is in a significantly less trafficked area than GWL's current location—which is just yards away from a busy intersection—making ingress and egress safer and more efficient. GWL's continued and improved service to the northern Nevada community is beneficial and community serving.

### **III. Considerations for CAB/NAB Comments**

Pursuant to South Valleys Area Plan SV.2.4 the following responses address how the final proposal responds to community input received from the Citizen Advisory Board. The responses are in no particular order and related concerns and comments have been summarized to avoid redundancy.

#### **1. The Subject Property is being "flipped" or quickly sold to another developer.**

The "for sale" sign on the Subject Property has not been removed yet. However, the Subject Property is not for sale. GWL has no intention of selling the Subject Property.

#### **2. An Industrial Use is inappropriate in the South Valleys and is not Permitted in a "General Rural" zone.**

GWL maintains that it is not an industrial use such as "Wholesaling, Storage, and Distribution" and is not similar in any way to the industrial uses allowed in a "General Rural" or "GR" zone. For example, the following uses are permitted in a "GR" zone with a special use permit:

**Aggregate Facilities.** Aggregate facilities use type refers to the **extraction and processing of sand, gravel and rock from the ground.** Typical uses include **sand and gravel pit and ancillary uses such as concrete and asphalt batch plants**

**Mining Operations.** Mining operations use type refers to the **extraction and processing of rocks and minerals from the ground,** but excludes uses classified under the petroleum gas extraction use type. **Typical uses include the mining of precious metals and industrial minerals.**

Petroleum Gas Extraction. Petroleum gas extraction use type refers to **the extraction of oil and natural gas from the ground and the temporary storage of oil at the well site. Typical uses include oil and gas wells.**

Table 110.302.05.4; 110.304.30(a), (i), (j) (emphases added).

Nonetheless, GWL recognizes the concern that a wholesale nursery may negatively impact the rural and scenic nature of the South Valleys and specifically the Pleasant Valley area. Accordingly, every effort will be made to mitigate the already limited noise, light, and dust pollution associated with GWL's use. As demonstrated by the fact that GWL has never been cited by the City of Reno for a noise, light, or dust related violation, GWL is confident that it will continue to adequately mitigate impacts associated with its use.

**3. There are insufficient water rights for the proposed uses.**

The water rights associated with the Subject Property and their use for GWL's proposed activities are the subject of conditional approval by the Nevada Division of Water Resources and will require GWL to work with the State Water Engineer and Washoe County to determine the projected groundwater demand. The groundwater and surface water rights held by GWL will be sufficient for all proposed uses subject to the conditions listed in the Staff Report. Staff Report at 17; Staff Report Exhibit A at 4-5 (water rights conditions).

**4. The proposed uses are inappropriate in a floodplain.**

GWL is aware that the Subject Property is in a floodplain and has engaged an engineering firm to address this issue. GWL has engaged Cardno Engineering to re-design Steamboat Creek to allow for better floodwater retention and management through the Subject Property and to prevent downstream flood issues. The design will incorporate requirements from the Army Corps of Engineers to enhance riparian and stream habitat and to minimize impacts to the waterway during construction. The project will also receive a Water Quality Certification permit from the Nevada Division of Environmental Protection. Exhibit D.

GWL anticipates County and FEMA review of the project proposal by December of 2017 with a construction date in the spring of 2018.

**5. The proposed uses will pollute existing irrigation networks.**

GWL is currently working with the Big Ditch Company, the non-profit corporation that manages the irrigation channel crossing the subject property, to ensure that GWL's activities improve the irrigation channel running through the property.

**6. The proposed uses will create significant dust and air pollution.**

As pictured below, GWL currently uses watering trucks and clearly posted speed limit signs to keep the property free from dust and debris. At its current location, GWL has never

been cited for dust or debris by the City of Reno and will continue to maintain its strict "no dust" policy.

**Clearly posted speed limit and "NO DUST" sign and damp soil at GWL's current location.**

**Storage bins surrounded by damp soil at GWL's current location.**

**7. The Subject Property is too close to residences.**

GWL is sensitive to concerns regarding its proximity to residences because it has been operating in close proximity to residences at its current location. One reason for GWL's move to the Subject Property is to avoid being in close proximity to residences. Accordingly, as depicted below, GWL's Colorock activities will take place approximately 1,400 feet away from the nearest residence and will be separated by a significant hillside.

**Colorock activities will be 1,400 feet from the Greenhalgh Family Trust residence.**

**8. The proposed uses will create significant noise pollution due to truck traffic and "beeping" when trucks back up.**

GWL understands the concerns regarding truck noise and has worked diligently to mitigate its effects at its current location. Some noise is unavoidable as Occupational Safety and Health Administration ("OSHA") regulations require certain trucks to "beep" as they are backing up for safety purposes. Even so GWL has never received a noise complaint despite operating in close proximity to neighboring businesses and residences at its current location. Notably, Reno Municipal Code and Washoe County Development Code both require that sound levels shall not exceed 65 decibels during daytime hours for property adjacent to residential areas. Reno City Municipal Code § 18.12.304(g); WDCD § 110.414.05(b). In fact, GWL is currently closer to neighboring residential and commercial property than it will be at the Subject Property and therefore anticipates that any truck noise can be successfully mitigated.

**9. The proposed uses will create light pollution.**

GWL has currently proposed having security lighting for each of the three proposed structures at the Subject Property. As stated by the Staff Report, any lighting will meet the standards of Article 414, *Noise and Light Standards* in addition to SV.2.7 to comply with "dark-sky" standards and SV.2.8 solar requirement. Accordingly, the measures will effectively mitigate any potential light pollution from the security lights.

**10. The proposed uses will create a significant traffic hazards and will damage Andrew Lane.**

GWL's application for a special use permit has been provided to the Nevada Department of Transportation ("NDOT"), the Regional Transportation Commission and Washoe County's traffic engineer for review. NDOT will require an additional traffic study in order to determine any necessary improvements to Highway 395. Specifically, the application is subject to an additional traffic study to quantify the number of trucks (triple, double, etc.) to determine a suitable driveway configuration and the need for deceleration and acceleration lanes, if applicable. Staff Report Exhibit A at 8.

Further, GWL's current location on South Virginia Street near South Meadows Parkway currently has approximately 23,000 Average Daily Trips while Highway 395 has been reduced to approximately 6,500 following the extension of I-580 to Carson City. GWL's employees and customers have safely navigated a much more heavily trafficked area at its current location. The reduced traffic levels in Pleasant Valley will make ingress and egress from the Subject Property a safe and efficient process.

Additionally, GWL's activities are seasonal. The majority of GWL's business is conducted from April to November each year. In the off-season months, GWL operates with a skeleton crew. Traffic to and from the Subject Property will be significantly reduced for approximately 4-5 months each year.

**11. The proposed uses require too many parking spaces.**

GWL's current proposed parking plan requiring 60 spaces is based on the number of vehicles required to operate and GWL's projected number of customers during peak operating. During its busy season GWL currently operates with approximately 45 vehicles. This includes roughly 24 pickups, six Class B vehicles, and 14 Class A vehicles. Roughly half of the pickups are company vehicles that are driven home by GWL employees and stored off-site. Similarly, many of the larger vehicles are at off-site locations throughout the day. Thus, the 60 spaces are only necessary to address a few peak period throughout the year.

GWL's activities are seasonal. Parking at the Subject Property will be significantly reduced for approximately 4-5 months each year.

Respectfully,

Garrett D. Gordon

To whom it may concern,

Gail Willey Landscaping has been doing business with Western Nevada Supply Company for almost 20 years. In that time, they have grown into one of our largest and most consistent customers, and have become an invaluable part of our culture and community. In speaking with a number of people Gail Willey has done work for in the past, they have nothing but good things to say about their employees and the quality of work they do.

We value Gail Willey Landscaping dearly as a customer, and their positive impact on the community and our company would be greatly missed should they be unable to continue doing the excellent work they have been doing for so many years.

If you have any questions, or need clarification on any of the points I have made, feel free to call me. Thank you for your time,

A handwritten signature in black ink, appearing to read 'Joe Gilbert', is written over a horizontal line.

Joe Gilbert

**KOMATSU EQUIPMENT**

To Whom It May Concern,

We have been doing business with Gail Willey Landscaping since 2013. I believe Gail Willey Landscaping has provided the community with amazing customer service. They are all very polite and hardworking. They have an attention to detail. They have the creativity and understanding to make things beautiful. They are punctual and are a responsible Company.

They have been a pleasure to work with as Customers of ours and we have never had any issues. If you have any questions, please don't hesitate to ask.

darbya@komatsueq.com

To whom it may concern,

Through the past 33 years that I have been in business, we have done business with Gail Willey Landscaping and High Sierra Trees. They have not only purchased several trucks from my Kenworth Dealership (providing local employment), they have generated a lot of service work for the dealership (also providing local employment).

They have created the State of Nevada and Washoe County thousands of dollars in sales tax revenue from their purchases. They have also provided me with quality landscaping for my business and for my home.

Look around. This is one of the top-quality businesses in our community. Their work is everywhere. If they are no longer able to provide their services it would have a definite impact on the community. Not just on the revenue they generate, the employment they create but aesthetically also.

Sincerely,

A handwritten signature in black ink, appearing to read "Rick Worthen". The signature is stylized with large, sweeping loops and is positioned above the typed name.

Rick Worthen

Owner

Western Nevada Kenworth, LLC

**Subject:** Special use permit

October 3, 2017

To whom it may concern,

Shafer Equipment Company, Inc. Has been a partner in business with Gail Willey Landscaping, Inc. since May of 2016.

Gail Willey Landscaping has enjoyed a high level of success in our community for many years. Their contributions to Shafer Equipment and to our community has proven to be invaluable. These contributions have made our company strong and successful. We look forward to continuing out relationships with Gail's team.

I have known Gail for many years and found him to be a wonderful steward of the land, not to mention his personal contributions to our community and church.

I feel it would be a terrible injustice if Gail Willey were not able to continue as valued partner in our community and business.

Please grant Gail Willey a special use permit to relocate his business to Pleasant Valley.

Respectfully,

Jim Crouse  
Territory Manager  
Shafer Equipment Company, Inc.

**From:** Mark Gookin, P.E.; Sarah Brown, Environmental Scientist  
**RE:** **Gail Willey Landscaping Project Status Memorandum**

---

The following items have been completed or are in progress for the Gail Willey Landscaping Project.

To date, the following has been completed:

- 1) Cardno has met with the Army Corps to discuss permitting of channel design. A Letter of Permission application was requested. Channel will incorporate appropriate mitigation for impact to channel, as required by the permit.
- 2) Cardno has begun the channel design to accommodate floodplain constraints associated with the channel and property. Cardno is in progress of channel re-design of Steamboat Creek to allow for better floodwater retention and management through the property, and protect downstream waters from flood issues as well.
- 3) Design incorporates requirements from Army Corps to enhance riparian and stream habitat of Steamboat Creek, and will employ Best Management Practices during construction to minimize temporary impacts to the waterway during construction. Project will also receive a Water Quality Certification permit from Nevada Division of Environmental Protection.
- 4) Design will go through County, then review to ensure safety and all flood concerns/requirements are addressed with new design before permits can be issued.
- 5) Project anticipates County and FEMA review to be complete by December 2017, and all other permits secured soon thereafter, for a construction start date of spring 2018 (dependent on water levels and runoff).

If you need additional information or have questions regarding the project, please don't hesitate to contact Sarah Brown at Cardno, Inc., 775.335.0079.
