Project #WAC23-0003

Rock Springs Solar

4/24/23

To Whom It May Concern

I Amy Dansie a current resident in close proximity of Rainbow Way and Fort Sage rd. I am seriously concerned about your proposed project that includes massive increase in traffic on the dirt roads upwind from our home. The dust and noise will be a threat to our health and wellbeing. We live out here to escape such impacts. I urge you to stop this project or relocate your main access road away from inhabited residential neighborhood. There is no justification to ruin our lives, hard as it is living off the grid and miles away from any help including fire protection our area currently does not have. There is already another Praana project trying to build in our neighborhood and we were informed that the fire protection plan listed in their documents was not legitimate. I am not able to drive anymore and do not have a way to escape any fire. Fire is a serious hazard in our area. I am scared for my life. I oppose this project.

Sincerely

Amy Dansie

Project #WAC23-0003

Rock Springs Solar

To Whom it May concern

I, Mike Maurer live in close proximity to Rainbow Way. I am going to be directly affected by the construction project going around Rainbow Way because the dust that this project will create will be impossible to control. No amount of water will control the dust. It will just turn to slime and destroy our already beat up dirt roads. I moved to this area to be in the wilderness. This is not an industrial zone that several other constructions have already created. Our nature is getting destroyed. Our endangered animals like Pronghorn are leaving this area. I have lived in this area for the past 7 years and Pronghorn Antelope used to come to my yard. Not anymore since the McCarthy Solar project took over with their construction. My nature view has been destroyed. My property value will decrease with further expansion of construction projects. My taxes have been reassessed and jumped up dramatically due to current building of these projects. No longer I am able to enjoy the Mountain View. It is no longer there. All I see is glare and reflection of solar panels that I am forced to stare at on a daily basis. Now notice of further expansion. My peaceful living is being severely damaged. Lack of fire protection plan is a real safety concern. We live in extreme fire danger zone. Any spark will ignite millions of sagebrush covering our valley. Increase in megawatts for this project is huge and with other constructions trying to take place could potentially create a collision of projects with negative outcome for us the residents. This project picked the most populated road of our neighborhood and it is absolutely unacceptable. I am asking Commissioners to stop this project for safety of residents along Rainbow way and for protection of our natural habitat that is being destroyed and ruined.

Thank you

Mike Maurer

Project # WSUP21-0001

Rock Springs Solar

To Whom it may concern

I am Phyllis N. Dansie and I live in close proximity of Rainbow way and Fort Sage rd. I am asking that you not build your project out here where people live (Rainbow Way is the most occupied road in our neighborhood) I am asking to please not allow many semi-trucks run through our dirt road because it will destroy our roads like it has already happened in the past. The dust and noise will be intolerable and we have no fire department in close range to our area to fight any fires the construction project may inadvertently cause. I have been notified by a current resident Alla Peacock who has a current appeal on another construction project Paana and Geotech that there is no fire protection plan for our area and it has been verified by Doyle Fire Department and Army Depot. All the other fire departments are too far from us. We moved out here to retire in peace and quiet. This project would ruin our lives and distress our animals. I am currently retired and cannot drive anymore. In case of emergency I have no way to escape. I cannot walk very far. My life is in danger if there is an emergency. I am also on oxygen on daily basis and the dust from this project will kill and deteriorate my health fast.

Please stop this project.

Earnestly,

Phyllis N. Dansie
