Review all information for accuracy, edit if needed, then click the check box acknowledging your understanding and responsibility of the project, this acts as your signature and puts a time stamp on date/time of submittal (a signed application is no longer required to be attached). Click **Continue Application** once complete and correct:

Signature on this asbestos assessment document does NOT constitute full Health Department approval for this project. Any additional Health permits such as are required for bar or restaurant operations, underground storage tanks, hazardous material disposal or air pollution sources must be obtained separately.

Signature by the Washoe County Health District does not warrant, nor should this report be taken to warrant, that asbestos was or was not present on stated property. Exposure to even small amounts of airborne asbestos fibers may cause cancer. For this reason the District Health Department recommends that all asbestos handling and abatement work be performed by certified asbestos contractors.

By checking this box, I agree to the above and accept responsibility for the project as described and certify that the information is accurate and current. I acknowledge that any changes to the project from how it is presented on the date of acknowledgement require AQMD notification. Submitting project information that is NOT accurate and current or failure to notify AQMD of changes to the project will result in a notice of violation with associated fines assessed.
