

SAMPLE PERMIT

- 1) **VISIBLE EMISSION PROHIBITION:** The owner and/or operator of a source engaging in dust generating activities shall not allow visible fugitive dust emissions for a period or periods accumulating more than 5 minutes in any hour. Washoe County District Board of Health Regulations Governing Air Quality Management 040.030(C)(1).
- 2) The owner and/or operator of any unpaved parking lot or staging area shall not allow visible fugitive dust emissions for a period or periods accumulating more than 5 minutes in any hour and shall meet at least one of the standards in 040.030(C)(2)(a).
- 3) The owner and/or operator of any unpaved haul/access road (whether at a work site that is under construction or at a work site that is temporarily or permanently inactive) shall not allow visible fugitive dust emissions for a period or periods accumulating more than 5 minutes in any hour and shall meet at least one of the standards in 040.030(C)(2)(b).
- 4) The owner and/or operator of an open area and vacant lot or any disturbed surface area on which no activity is occurring shall meet at least one of the standards in 040.030(C)(2)(c).
- 5) All open storage piles shall be stabilized by utilizing at least one of the standards described in 040.030(C)(2)(d).
- 6) The owner and/or operator shall erect an informational sign at the main entrance to the project site prior to breaking ground. The sign shall remain in place for the duration of the project. The sign shall meet all the criteria listed in the attached Dust Control Permit Sign Template. 040.030(C)(3)(c).
- 7) The owner and/or operator shall submit an updated Dust Control Permit Application upon change of ownership and/or responsibility for the Dust Control Permit. 040.030(C)(3)(b)(2).
- 8) When hauling bulk materials off-site onto paved public roadways, the owner and/or operator shall prevent spillage or loss of bulk material from holes or other openings in the cargo compartment floor, sides, and/or tailgate using at least one of the following control measures: cover all haul trucks with a tarp or other suitable closure, ensure bulk materials contain enough moisture and/or dust suppressant to prevent fugitive dust emissions during transport, and/or load all haul trucks such that the freeboard is not less than six (6) inches. 040.030(C)(4)(a).
- 9) The owner and/or operator shall install and maintain a suitable trackout control device that controls and prevents trackout and removes particulate matter from tires and the exterior surfaces of haul trucks and/or motor vehicles that traverse such work site at all exits onto a paved public roadway. Clean-up of spillage, carry-out, erosion, and/or trackout shall be performed at least daily or immediately at any time during the day if trackout is creating visible fugitive dust emissions for a

period or periods accumulating more than 5 minutes in any hour. 040.030(C)(4)(b).

10) Cessation of operations is required if dust cannot be controlled due to equipment operations and/or gusty wind conditions. During these conditions, continued dust control measures must be implemented as defined in 040.030(B)(5).

11) The Dust Control Permit shall be kept on the specific job site and made available to the Control Officer immediately upon request. 040.030(E)(2).

12) Any person who conducts dust generating activities shall maintain daily records demonstrating compliance with 040.030(C). Daily records shall be made available to the Control Officer immediately upon request. 040.030(E)(2).

13) Failure to comply with the provisions of an approved Dust Control Permit shall be deemed a violation of District Regulations and this Dust Control Permit. Citations may be issued for each day of violation, in amounts up to \$10,000 per day as stated in 020.040 Civil Fines and Penalties.
