Voya Update

At Voya, we are making strides toward being America's Retirement Company® by helping individuals become financially independent – one person, one family, one institution at a time. Within the Voya Update section, we explain why a growing number of people are choosing Voya to meet their financial and retirement planning needs.

Voya Financial Fact Sheet

Fourth-Quarter 2022

VOYA
FINANCIAL

Our aspirational vision:

Clearing your path to financial confidence and a more fulfilling life

Voya Financial, Inc. (NYSE: VOYA), is a leading health, wealth and investment company offering products, solutions and technologies that help its individual, workplace and institutional clients become well planned, well invested and well protected. Voya also is purpose-driven and equally committed to conducting business in a way that is socially, environmentally, economically and ethically responsible. Voya has earned recognition as: one of the World's Most Ethical Companies® by the Ethisphere Institute; a member of the Bloomberg Gender-Equality Index; and a "Best Place to Work for Disability Inclusion" on the Disability Equality Index.

Investment Management

Voya Investment Management manages public and private fixed income, equities, multi-asset solutions and alternative strategies for institutions, financial intermediaries and individual investors, drawing on a 50-year legacy of active investing and the expertise of 300+ investment professionals.

Workplace Solutions:

Voya provides workplace benefits and savings products, technologies and solutions through its Wealth Solutions and Health Solutions businesses.

- Wealth Solutions

Voya is a leading provider of retirement products and services in the U.S., serving more than 52,000 institutional clients and over 6 million individual retirement plan participants. Voya also has approximately 600 financial professionals serving retail and workplace clients. Voya is focused on guiding Americans to greater retirement readiness and financial wellness through employer-sponsored savings plans and holistic retirement and income guidance.

- Health Solutions

As a leading provider of group supplemental health insurance in the U.S., Voya provides a comprehensive and highly flexible portfolio of stop loss, life, disability, and voluntary insurance products — as well as health savings and spending accounts — to businesses covering more than 6.6 million individuals through the workplace.

Insurance products are underwritten by ReliaStar Life Insurance Company (Minneapolis, MN) and ReliaStar Life Insurance Company of New York (Woodbury, NY). Within the State of New York, only ReliaStar Life Insurance Company of New York is admitted, and its products issued. Both are members of the Voya® family of companies. Voya Employee Benefits is a division of both companies. Product availability and specific provisions may vary by state.

Voya acquires Benefitfocus

On Jan. 24, 2023, Voya completed its acquisition of Benefitfocus, Inc., an industry-leading benefits administration technology company that serves employers, health plans and brokers. The transaction accelerates Voya's workplace-centered strategy and increases the company's capacity to meet the growing demand for comprehensive benefits and savings solutions at the workplace. Benefitfocus extends Voya's workplace benefits and savings reach and capabilities by providing benefits administration capabilities to 16.5 million individual subscription employees across employer and health plan clients.

Benefitfocus®

Leveraging digital capabilities to drive better outcomes

Voya delivers digital guidance and solutions that enhance the participant education and user experience through all life stages. In 2021, Voya had more than 100 million digital interactions with customers. Examples of Voya's focus on customer needs and driving innovation include:

- myVoyage, a first-of-its-kind personalized financial-guidance and connected workplace-benefits digital platform. Offering a "one stop" solution, myVoyage provides individuals with a complete view of their financial picture, inclusive of workplace benefits and savings accounts along with the integration of external accounts such as personal banking and credit accounts to help better manage one's health and financial well-being.
- Voya Claims 360 is an integrated and intuitive model designed to simplify the claims process for supplemental health insurance products we offer. From the time an employee enrolls to when a claim is processed and paid, Voya Claims 360 kicks off a variety of proactive actions to help employees get the most from their benefits.

Awards and Recognitions

Third-party awards and/or rankings about entities within the Voya family of companies are given based upon various criteria and methodologies. Awards and/or rankings are not representative of actual client experiences or outcomes, and are not indicative of any future performance. For certain awards/rankings, Voya pays a fee to be considered. For material facts regarding an award, including but not limited to whether a fee was paid to be eligible for the award, please visit <https://www.voya.com/about-us/our-character/awards-and-recognition>.

Strengthening our culture through workplace flexibility, employee well-being and diversity, equity and inclusion

85%

of employees would recommend Voya as a good place to work.

(Source: Emotional Well-being Virtual Focus Group of Voya employees, facilitated by Willis Towers Watson, March 29, 2022.)

Voya provides a variety of benefits and services for its employees with an emphasis on physical, mental and financial well-being, including a no-cost tuition program, access to financial advisors and paid parental leave for both parents after the birth or adoption of a child.

81%

diverse hiring rate of underrepresented talent for mid-senior level.

Voya is building a workforce that better reflects the diversity of our society, including attracting and recruiting talent from underrepresented groups, and offering development programs to increase equity in career growth and mobility.

25%

of employees belong to one or more of Voya's 11 employee-led councils.

Each council creates a supportive community of colleagues who share similar experiences and their allies, as they learn to better understand and embrace differences and support each other. Councils are also business collaborators who help the company advance strategy through business plans, goal development and progress tracking.

Voya's culture and values are reflected in how we serve clients and communities

Voya Foundation makes a meaningful difference in the community and empowers employees to engage in supporting causes that matter most to them, including nonprofits that serve health and human services, education and animal welfare.

Through Voya's Executive Board Program, 60 Voya leaders serve on nonprofit boards in local communities, where they can share their management skills.

Each employee receives 40 hours per year of paid time off to volunteer.

All full-time employees receive up to \$5,000 from Voya Foundation to match personal donations to any 501(c)3 organization.

2022 Employee Giving Campaign

Each year, Voya holds an Employee Giving Campaign to support our communities and demonstrate our commitment to giving and volunteerism. Through the campaign, we are able to give back in a fun way while creating awareness about others in need within our local communities and across the country.

Voya Cares® resources, thought leadership and advocacy for disability inclusion

Voya Cares is committed to making a positive difference in the lives of people with disabilities and their caregivers from birth through aging. The program provides advocacy, educational resources and workplace solutions to help employers meet the complex needs of the special needs community in their workforce. The newest Voya Cares content focuses on Employment Extenders and Sandwich Caregivers. Learn more by visiting VoyaCares.com.

Voya also received a score of 100% on the 2022 Disability Equality Index®, designating the company as one of 240 companies named as a "Best Place to Work for Disability Inclusion" for the fifth consecutive year.

Products and services offered through the Voya® family of companies.

PLAN STATEMENT

Here's a summary of your plan's current and prior period assets. In addition, total assets are graphed in the chart below for the 5 most recent periods. Please note, in some cases there may be differences between amounts noted here and in other reports or statements you receive. Differences may be due to timing and reporting methods. For this reason, we suggest you do not rely solely on the Plan Review for audit purposes.

Plan summary

Compare by period

	(01/01/2022 - 03/31/2022)	(01/01/2023 - 03/31/2023)
Beginning of Period Plan Assets	\$14,979,197.48	\$12,815,661.21
Contributions	\$136,267.61	\$162,191.32
Distributions	-\$50,795.02	-\$272,332.24
Loan Activity	\$6,569.27	\$52,908.49
Other Activity	-\$2,308.43	-\$139,524.62
Dividends	\$24,511.29	\$24,416.70
Appreciation/Depreciation	-\$697,307.49	\$465,564.44
End of Period Plan Assets	\$14,396,134.71	\$13,108,885.30

Appreciation/Depreciation reflects the investment gains/losses during the period reported excluding assets held outside Voya. If applicable, Dividends may represent dividends earned on assets held in NAV Funds or Self Directed Brokerage Option accounts.

Plan Activity

The Plan Activity is designed to lighten your burden and provide you with several easy-to-read analysis tools. These tools will empower you to actively analyze plan performance and objectively make recommendations for optimizations.

TRANSACTION ACTIVITY DETAIL

Below is a summary of your plan's transaction activity and net cash flow, along with highlights of the more notable transactions for the current period and prior periods. Monitor this data over time to ensure contribution levels are satisfactory and that distributions haven't risen unexpectedly, possibly indicating a need for further employee education.

Summary activity

	Prior Period 01/01/2022 - 03/31/2022		Current Period 01/01/2023 - 03/31/2023	
	Amount	Participants	Amount	Participants
Contributions	\$136,267.61	92	\$162,191.32	84
Distributions	-\$50,795.02	6	-\$272,332.24	13
Loan Activity	\$6,569.27	15	\$52,908.49	14
Other Activity	\$22,202.86	160	-\$115,107.92	154

The Summary Activity section does not include daily valuations of investment options; thus it does not reflect market appreciation or depreciation. Net Cash Flow below is determined by subtracting the total Distributions from the total Contributions for the period.

Net cash flow by period end (contributions vs. distributions)

For sponsor use only. Not for distribution to plan participants.

DIVERSIFICATION

It's sensible for each participant to hold a well-diversified retirement portfolio. Doing so reduces each investor's exposure to risk while optimizing his/her potential for return. The information that follows provides some insight as to how your participants are diversifying their investments.

Investment diversification

As of 04/21/2023

62%

Voya views a person as diversified if their investment mix is made up of at least one fixed fund, one U.S. fund, and one Non U.S. fund and less than 20% in company stock, as applicable. Alternately they are considered diversified if they are invested in an asset allocation fund.

Diversification of participant assets by number of participants

As of 03/31/2023

Average number of investment options utilized per participant

	Mar 2020	Mar 2021	Mar 2022	Mar 2023
With Asset Allocation Funds	5.0	4.6	4.6	4.6
Without Asset Allocation Funds	5.7	5.4	5.4	5.4

The average number of investment options utilized per participant without asset allocation funds excludes those participants who are invested solely in an asset allocation fund.

Please remember, using diversification as part of an investment strategy neither assures nor guarantees better performance and cannot protect against loss in declining markets.

2.7

Plan Investment Review

The Plan Investment Review provides a comprehensive overview of all of the investment options under your plan. It highlights multiple investment analysis tools, employee diversification, and several key facets to help you determine if the plan is on track to achieve the desired performance goals.

TOTAL PLAN ASSETS AND CONTRIBUTIONS BY INVESTMENT OPTION

Compare the allocation of existing assets with that of the current period. Do you see a dramatic change where assets are currently being allocated? Does that shift make sense given current market conditions...or your employees? Are the participants well diversified across the asset classes?

PERFORMANCE UPDATE

WASHOE COUNTY 401A PLAN

Average Annual Total Returns as of: 03/31/2023 (shown in percentages)

Variable annuities and mutual funds offered through a retirement plan are intended as long-term investments designed for retirement purposes. Money distributed from a 403(b) plan, 401(a)/(k) plan, or a 457 plan will be taxed as ordinary income in the year the money is distributed. Early withdrawals from a 403(b) plan and a 401(a)/(k) plan, if taken prior to age 59 1/2, will be subject to the IRS 10% premature distribution penalty tax, unless an exception applies. This IRS premature distribution penalty tax does not apply to 457 plans. Account values fluctuate with market conditions, and when surrendered the principal may be worth more or less than the original amount invested.

The performance data quoted represents past performance. Past performance does not guarantee future results. For month-end performance which may be lower or higher than the performance data shown please call 800-584-6001. Investment return and principal value of an investment will fluctuate so that, when sold, an investment may be worth more or less than the original cost.

Voya will assess an annual asset-based service fee of 0.03% to all investment options including balances held in your plans Stability of Principal or Fixed Account. This fee is deducted from your account at a frequency determined by your plan monthly or quarterly and will be pro-rated across balances held in each of the investment options. These returns do not reflect any plan level administrative fees, if applicable; if reflected, returns would be less favorable. Please contact your local representative for more information.

The returns assume reinvestment of all dividends (ordinary income and capital gains) and are net of management fees and other fund operating expenses.

You should consider the investment objectives, risks and charges, and expenses of the funds carefully before investing. The prospectus contains this and other information. Anyone who wishes to obtain a free copy of the fund prospectuses may call their Voya representative or the number above. Please read the prospectus carefully before investing.

Returns less than one year are not annualized. Fund Inception Date is the date of inception for the underlying fund, and is the date used in calculating the periodic returns. This date may also precede the portfolio's inclusion in the product.

The risks of investing in small company stocks may include relatively low trading volumes, a greater degree of change in earnings and greater short-term volatility.

Foreign investing involves special risks such as currency fluctuation and public disclosure, as well as economic and political risks.

Some of the Funds invest in securities guaranteed by the U.S. Government as to the timely payment of principal and interest; however, shares of the Funds are not insured nor guaranteed.

High yielding fixed-income securities generally are subject to greater market fluctuations and risks of loss of income and principal than are investments in lower yielding fixed-income securities.

Sector funds may involve greater-than average risk and are often more volatile than funds holding a diversified portfolio of stocks in many industries. Examples include: banking, biotechnology, chemicals, energy, environmental services, natural resources, precious metals, technology, telecommunications, and utilities.

*The Gross Expense Ratios shown do not reflect temporary fee or expense waivers that may be in effect for a fund. The Net Expense Ratios reflect any applicable temporary fee or expense waivers. The performance of a fund with a temporary fee or expense waiver would have been lower if the gross fund fees/expenses listed had been reflected.

Additional Notes

(1)The current rate for the Voya Fixed Account - 457/401 II MC 905, Fund 4301 is 2.00%, expressed as an annual effective yield. The current rate may change and be higher or lower than the previously identified rate but is guaranteed not to be less than 1.00%. VRIAC will not apply a decrease to the current rate following a rate change initiated solely by us prior to the last day of the three-month period measured from the first day of the month in which such change was effective. Note: The current rate for an initial investment in the fixed account previously identified may be in effect for less than a full three-month period.

Voya Fixed Account - 457/401 II - Voya will credit interest at an annual effective rate of 2.00% through 5/31/2024. Beginning 06/01/2024 and thereafter, the credited rate for your plan will be the same as the standard Voya Fixed Account - 457/401 II credited rate in effect at that time. Please note the Guaranteed Minimum Interest Rate is 1.00%. Guarantees are based on the claims[1]paying ability of Voya Retirement Insurance and Annuity Company. Restrictions may apply to transfers of funds from the Voya Fixed Account - 457/401 II to other contract investment options. Please refer to your product prospectus / disclosure booklet or call Voya at (800) 584-6001 for more information.

(2)Allspring Disciplined U.S. Core Fund - Institutional Class: Expenses have been adjusted as necessary from amounts incurred during the Fund's most recent fiscal year to reflect current fees and expenses. The Manager has contractually committed through November 30, 2022, to waive fees and/or reimburse expenses to the extent necessary to cap Total Annual Fund Operating Expenses After Fee Waiver at 0.48% for Institutional Class. Brokerage commissions, stamp duty fees, interest, taxes, acquired fund fees and expenses (if any), and extraordinary expenses are excluded from the expense cap. Prior to or after the commitment expiration date, the cap may be increased or the commitment to maintain the cap may be terminated only with the approval of the Board of Trustees.

(3)AMG GW&K Small Cap Value Fund - Class N: AMG Funds LLC (the "Investment Manager") has contractually agreed, through at least May 1, 2022, to waive management fees and/or pay or reimburse the Fund's expenses in order to limit Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursements (exclusive of taxes, interest (including interest incurred in connection with bank and custody overdrafts and in connection with securities sold short), shareholder servicing fees, distribution and service (12b-1) fees, brokerage commissions and other transaction costs, dividends payable with respect to securities sold short, acquired fund fees and expenses, and extraordinary expenses) of the Fund to the annual rate of 0.90% of the Fund's average daily net assets (this annual rate or such other annual rate that may be in effect from time to time, the "Expense Cap"), subject to later reimbursement by the Fund in certain circumstances. In general, for a period of up to 36 months after the date any amounts are paid, waived or reimbursed by the Investment Manager, the Investment Manager may recover such amounts from the Fund, provided that such repayment would not cause the Fund's Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursements (exclusive of the items noted in the parenthetical above) to exceed either (i) the Expense Cap in effect at the time such amounts were paid, waived or reimbursed, or (ii) the Expense Cap in effect at the time of such repayment by the Fund. The contractual expense limitation may only be terminated in the event the Investment Manager or a successor ceases to be the investment manager of the Fund or a successor fund, by mutual agreement between the Investment Manager and the AMG Funds Board of Trustees or in the event of the Fund's liquidation unless the Fund is reorganized or is a party to a merger in which the surviving entity is successor to the accounting and performance information of the Fund.

(4)Allspring Small Company Growth Fund - Class R6: Includes the fees charged by the Manager for providing advisory services to the master portfolio in which the Fund invests substantially all of its assets. Includes other expenses allocated from the master portfolio in which the Fund invests.

(5)The Investment Option is neither a mutual fund nor part of a Separate Account. The returns listed do not include the impact of contract charges. Please refer to the contract or disclosure book to determine which Fixed Interest Options are available for your specific plan. The Investment Option is offered through Voya Retirement Insurance and Annuity Company.

(6)American Funds Target Date: Depending on the proximity to its target date, which we define as the year that corresponds roughly to the year in which the investor expects to retire, the fund will seek to achieve the following objectives to varying degrees: growth, income and conservation of capital. The fund will increasingly emphasize income and conservation of capital by investing a greater portion of its assets in fixed income, equity-income and balanced funds as it approaches and passes its target date. In this way, the fund seeks to balance total return and stability over time.

Multi-Asset Perspectives: Peak inflation but slower growth

Weak global growth for the year ahead appears almost certain. The outlook for capital markets is anything but.

Tactical indicators

Economic growth (negative)

The US labor market has proven resilient in the face of aggressive monetary tightening, but other areas of the economy (housing, manufacturing, etc.) are struggling. We believe a mild, brief recession remains a risk in 2023, but growth for the full year may still be achievable.

Fundamentals (neutral)

Consensus earnings expectations for 2023 and 2024 seem overly optimistic given our relatively low growth outlook.

Valuations (neutral)

US equity valuations look reasonable, with forward P/E ratios hovering around their long-term average. But with corporate bond yields and equity earnings yields at similar levels (Exhibit 2), bonds look relatively attractive on a risk-adjusted basis.

Sentiment (neutral)

Some technical indicators have improved, but most institutional investors remain bearish on stocks, and the BofA Global Fund Manager Survey shows cash balances remain at historically high levels.

Stocks and bonds finish a hard 2022 on a high note. The major stock indexes overcame negative returns in December to end the fourth quarter with strong gains in what was otherwise an abysmal year. International stocks outperformed US equities, with Europe and the UK leading the way higher. Despite the continued negative overhang of the war in Ukraine contributing to energy supply challenges and painfully high inflation, the European region staged a remarkable rally.

Many signs suggest Europe is most at risk of a recession, but the costs of the energy supply shock haven't been as bad as feared (yet) due in part to a warmer-than-usual winter. In addition, central banks have made it abundantly clear they are committed to stabilizing prices, which investors have viewed favorably. Moreover, and importantly for emerging markets, the US dollar sold off hard from its September peak, releasing some of the pressure that had built up over the epic period of strength that began in the first half of 2021.

The dollar weakness was welcome relief for non-dollar assets — and particularly for emerging market bonds, which generated large gains in the final three months of the year. Long-term US Treasury prices fell, whereas investment grade and high yield corporate bonds rose on tighter spreads.

Portfolio positioning

Equities	Underweight	
US large cap		Larger US firms are better positioned to withstand prolonged inflationary pressures and have more durable earnings streams than companies of other regions or sizes.
US small cap		Small caps continue to trade at a sizable discount to large caps but could lag if investors take a more defensive posture.
International		Europe is likely to enter a recession as it contends with energy supply issues and heightened geopolitical risks. Japan's easing of yield curve control signals that it may be removed when management of the BoJ changes at the end of 1Q23.
Emerging markets		We have upgraded EM with China's zero-Covid policy headwinds abating, a better inflation backdrop, and fewer geopolitical and currency headwinds from the US.
REITs		REITs remain expensive; we see other income investments as better alternatives.
Fixed income	Overweight	
US core		Higher rates should depress economic activity and begin weighing on long-term bond yields. Duration should outperform in this scenario and serve as a hedge to equity beta as rates start to normalize.
Inflation (TIPS)		Given our view that the Fed is near the end of its tightening cycle and that inflation could fall quickly, we find nominal yields to be more attractive than real yields.
Non-investment grade		High yield spreads have widened but do not provide sufficient compensation for the likely rise in defaults that will accompany the looming recession.
International		Low relative yields and stiff inflation headwinds from Europe keep us favoring US fixed income.

Underweight Neutral Overweight

Inflation has peaked and should continue to head lower.

Inflation progression and policymakers' responses will continue to be among the principal global macro drivers in the year ahead. Although inflation remains unacceptably high, data suggests it has peaked, with meaningfully lower core goods and energy prices. Income-sensitive components of the price index baskets, such as shelter and services, are proving stickier given the still strong labor market and high personal income. However, we are beginning to see the effects of declining demand, with wage gains cooling (Exhibit 1), which we expect will continue. This combination will contribute to a steady fall in inflation to the low single digits by the end of the year.

Exhibit 1: Wage gains are beginning to cool

Atlanta Fed wage tracker, 3-month moving average

As of 11/30/22. Source: Federal Reserve Bank of Atlanta. The Atlanta Fed's Wage Growth Tracker is a measure of the nominal wage growth of individuals. It is constructed using microdata from the Current Population Survey (CPS) and is the median percent change in the hourly wage of individuals observed 12 months apart.

Central banks are committed to their current paths.

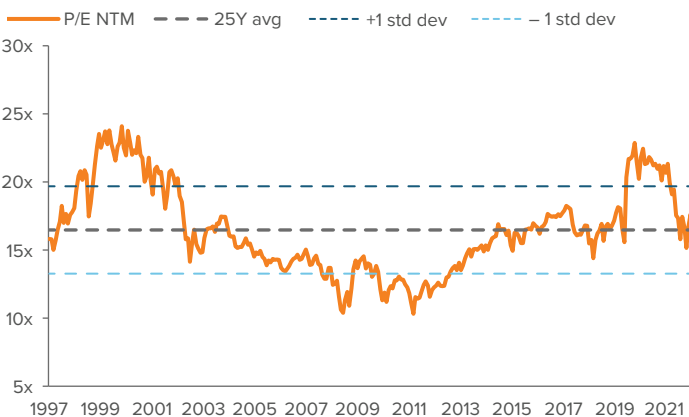

While we are confident inflation is moving in the right direction, developed market central banks have made it clear that they are not satisfied with their progress so far. We do not foresee a shift in the central bank policy prescription. With more tightening in store and explicit declarations that there will be no rate cuts in 2023, a contraction in developed market growth seems likely. Whether or not a US recession is formally affirmed, we are experiencing a slowdown that has impacted asset prices. The economy is likely to deteriorate further from here. We don't anticipate an especially severe downturn, but instead think the second half of this year will see moderate inflation, more normal interest rates and slow but positive growth. Eventually, we think investors will come around to this view and that equities will begin to discount such a scenario. However, this picture seems a long way off given the challenging current macro environment facing stocks.

Equities face a host of challenges in 1H23 that keep us

tactically underweight. Top-line revenues should fall along with demand, and the prolonged period of rising costs is likely to erode profit margins — including those of US large cap companies, which have thus far been relatively successful in maintaining pricing power. Although valuations are well off their peaks, US stocks aren't cheap, with the forward P/E on the S&P 500 sitting around its 25-year average and corporate bond yields roughly equal to earnings yields (Exhibit 2). There are also numerous unresolved downside risks. In this setting, we conclude that a more tactical approach is warranted and hold a neutral position in stocks to maximize flexibility as we await more clarity.

Exhibit 2: Historical equity valuations look reasonable, but bonds have become relatively more attractive

S&P 500 P/E next 12 months (NTM)

As of 01/04/23. Source: FactSet, JP Morgan, Moody's, St. Louis Fed.

Equity earnings vs. bond yields

Exhibit 3: Treasury yields tend to peak along with the fed funds rate

US Treasury yields and federal funds rate

As of 01/04/23. Source: Bloomberg, Piper Sandler Companies.

The bond bear market is likely over. Following one of the worst years on record, bonds now look attractive. Positive real yields across the interest rate curve present attractive carry for the first time in years. With the Fed hiking cycle near its end, we expect the hand-off from inflation risk to growth risk should force yields lower (Exhibit 3), and we've therefore extended duration. Additionally, the volatility in rates and the correlation between stocks and bonds should normalize, helping bonds resume their role as a ballast within multi-asset portfolios.

The US looks comparatively favorable to its competitors. The US is further along in the inflation fight and still more geopolitically insulated compared to the Eurozone, which faces an increased probability of a decline in output. The strong fourth-quarter rally staged by European stocks only serves to further dissuade us from allocating more to the region.

Exhibit 4: The US dollar typically strengthens in global recessions and during risk-off periods

US Dollar Index (DXY)

As of 01/03/23. Source: Bloomberg.

China also closed out the year on a high note, but we are more upbeat on developments there. The move away from zero-Covid and the seeming relaxation of tensions with the US are positives. Furthermore, China hasn't overheated like the rest of the world. This economic improvement makes emerging markets more attractive overall and offers the potential for a surprise to the upside. While the US dollar is less likely to be a headwind to international assets (Exhibit 4), the currency should retain its defensive properties in risk-off scenarios.

In sum, we believe the global economic slowdown will make 2023 more difficult than 2022 for individuals and companies, especially if there an outright recession unfolds. However, we are confident that long-only multi-asset investors will have a more friendly environment in which to operate and that globally diversified mixes of stocks and bonds should make up the lion's share of most portfolios (despite the lack of diversification benefits last year). We believe it is an approach that should continue to pay off in the long run.

Tug of war between hawkish central banks and a resilient private economy

Douglas Côté, CFA
Head of Global
Perspectives Strategies

In what is certainly an understatement, 2022 was a year to wish a less than fond farewell. The Federal Reserve was still pumping stimulus into the economy at the beginning of the year—yes, hard to believe—but by March got, uhm, serious with a 25 basis point increase in its Fed funds rate. Russia invaded the Ukraine in what was expected to be an expedient victory. An energy crisis enveloped Europe, made worse by Russia but not caused by it, as years of European failure to secure diversified sources of energy came home to roost. What ensued was a raging 40-year high of inflation that was anything but “transient,” decimating financial assets in the worst rout seen since 2008.

The big question for many investors: Should I be in the market right now?

The hangover is a doozy and is expected to linger through 2023. The Fed got it wrong, and it's determined to right the ship to save face, even if the boat sinks along the way. But instead of salvaging its image, the Fed might just be setting itself up for the dubious honor of getting it wrong in both directions. Think about it: One year on, prices have surged to record levels for autos, food, energy and shelter. It could pay to be a contrarian, as investors are stampeding in the same direction to protect against inflation. It may just be time to lock in high yields and dividends with the view that inflation is dissipating. The Fed's mistake may be that it is looking in the rear-view mirror, fighting the last war. Bad for the Fed, but good for markets.

Despite the stress of higher rates, the private economy continues to be resilient. Wall Street's expectation is that we'll see a demand-driven recession and easing demand would help the Fed's fight against inflation. But that has yet to happen. The economy is being driven by a relentlessly strong consumer in a tight job market, where there are nearly two openings for every applicant. The “delta” of the world economy has recently shifted up like a hockey stick, with China coming back on-line by eliminating Covid quarantines. To see the impact of China's reopening on the world economy in real time, keep an eye on whether oil prices revert higher.

Forecast 2023

Figure 1: Global Perspectives 2023 forecast

Market Fundamentals	2023 Forecast
S&P500 Index Level	\$4,125
S&P500 EPS	\$237
Crude Oil (WTI)	\$85 BBL
Gold	\$1,850/OZ-T
10 Year UST Yield	3.50%
Trade Weighted \$ (DXY)	100
US GDP Growth	1.0%
US Unemployment	4.2%
Inflation	3.0%

This tug of war between a hawkish Fed and a resilient private economy is what we expect to see during the coming year. Let's review our own Voya Global Perspectives “As, Bs and Cs” as measurements of the private economy:

A — Advancing corporate earnings and U.S. economic growth

The S&P 500 grew earnings in 3Q22 by 4.4%, with topline revenue growth at 11.1%. Over the past seven quarters, positive quarterly earnings growth on an annual basis has been associated with a continued bull market in earnings. The consensus forecast for the full year of 2022 is expected to be 5.8% per share (\$220), while 2023 is projected to be 4.8% per share (\$230). (Source: Refinitiv)

Corporate earnings growth outperformed the economy in 2022, so what does that mean for the coming year? The economy made a big comeback in the third quarter. Recall that U.S. GDP contracted 1.6% in 1Q (sequentially) and 0.6% in 2Q. But in 3Q, GDP jumped by 3.2%. Personal consumption expenditures increased 2.3%, primarily due to higher services consumption. At the same time, the Atlanta Fed's GDPNow forecast for 4Q is a robust 3.1%. The private economy is demonstrating an astounding resilience given that restrictive monetary policy has devastated markets globally.

Earnings and the economy may not be the same thing, but they do rhyme. Given our own \$237 per-share earnings growth expectation for 2023, what does that imply for the S&P 500's final print in 2023? That depends on the outcome of the tug of

war between hawkish central banks and the world's resilient private economy.

Recall that interest rates can be applied as a discounting mechanism for future cash flows. Inflation, a key driver of interest rates, is hovering at around 7% in the US. The Fed funds rate is currently 4.5%, on its way to 5% or even higher in 2023. Europe is playing catch-up, with plans to markedly increase interest rates over the course of 2023. Applying the historical P/E ratio for the United States, our \$237 per-share S&P earnings estimate equates to an S&P price of \$3,555 compared with a 2022 ending price of \$3,840 — rather pessimistic given the implied drop in share prices.

In a contrarian scenario (my base case), our P/E forecast jumps to 17.4x, and multiplied by our anticipated earnings level, produces an estimate of \$4,125. That result would imply a roughly 7.4% return. That may not sound like much, but it sure beats a hefty negative return. The good news is that I expect better returns out of diversifying into assets such as U.S. Midcap, U.S. Small cap, MSCI Emerging Markets, and fixed income.

Figure 2: Fundamentals drive markets

Source: Refinitiv – Thomson Reuters and FactSet, Voya Investment Management, as of 12/31/22. Earnings per share (EPS) is the portion of a company's profit allocated to each outstanding share of common stock. The S&P 500 index is a gauge of the U.S. stock market that includes 500 leading companies in major industries of the U.S. economy. **Past performance is no guarantee of future results. Indices are unmanaged and not available for direct investment.**

Broadening manufacturing

The U.S. ISM dropped from 49.0 to 48.4 in December, indicating economic contraction based on new orders and shipments despite the growth in employment. In the most recent December report manufacturers' prices paid dropped to 39.0 from the 78.5 reading of June. Manufacturers are facing major headwinds from high interest rates and mounting indications of recession. At the same time, they've benefited from the need to rebuild inventories into 2023 following a prolonged period of supply chain disruptions. This supply chain rebound has had an immediate remedial impact on inflation.

Figure 3: Global Manufacturing PMIs – Early Indicator of Recession: “Bad News is Good News”

Source: Institute of Supply Management, FactSet. The Purchasing Managers' Index (PMI) is an indicator of economic activity in the manufacturing sector. Measures above 50 indicate economic expansion, measures below 50 indicate economic contraction. PMI's as of 11/30/22.

The strong U.S. dollar, though off its high in September, makes exports more expensive and imports cheaper, further hurting U.S. sales. A strong dollar also raises the prices that foreign nations pay for U.S. goods, directly hitting U.S. companies' bottom lines.

Generally, a strong dollar would benefit these foreign countries by increasing their competitiveness on exported goods prices. Instead, the Fed's lightning-speed rate increases have wreaked havoc on their currencies, especially in the UK. Britain is already in a recession and Europe will likely follow. It's the U.S. and China that will keep the global economy out of generalized recession, or at least pave the way for a soft global landing.

Figure 4: The Fed's Policy Shift in 2020 Locked in its Inflation “FAIT”

Fed Funds Target Rate

Source: FactSet, Fed Funds Target Rate, data as of 12/30/22. Average Fed Funds Rate is average since 1988. “FAIT” is the FOMC’s “Flexible Average Inflation Targeting”.

Europe and Britain Hit by Trifecta of Inflation, Energy and Deficits

Action Economics, LLC, reports that “the ECB’s quantitative tightening has a non-negligible risk that the withdrawal of (monetary stimulus) support won’t be as smooth as officials hope. Governments,” they continue, “are facing higher debt financing costs and are forced to invest heavily in new energy-infrastructure with the transition away from Russian gas. On top of this, lower growth means lower tax revenues, and government also need to finance energy-support measures. Rising deficits mean that governments are set to flood markets with higher debt issuance, just at the time that the ECB is reducing its balance sheet.”

The ECB and BOE are late to the party but intend to bring hawkish monetary policy to raise yields significantly. The BOJ to a lesser degree, but Japan’s central bank has raised its cap on interest rates (yield curve control). These global rate increases will exert more pressure on the U.S. dollar and likely prop up U.S. yields as demand for high-yielding currencies sends investors elsewhere.

China lockdowns and slowing growth

The lockdowns in Shanghai and other cities throughout China are winding down, allowing its 1.4 billion people to travel without restrictions. But many countries are restricting Chinese movement on concerns of triggering a new wave of the pandemic. Meanwhile, the Caixin China General Manufacturing PMI unexpectedly edged up to 49.4 in November 2022 from 49.2 in October, above market forecasts of 48.9. However, these weakish production numbers could look very different in the months to come in the wake of reopening.

China is the wild card in markets, spurring on global growth just when global central banks are trying to slow things down. Domestic travel in China alone will raise demand for oil and gas, just as prices have been coming down.

Consumers could be the gamechangers

The consumer could have a major impact on the direction of the economy — but will it be positive or negative? U.S. retail and food services sales dropped 0.6% in November 2022 compared to the previous month. But more recent higher-velocity data from Mastercard SpendingPulse showed that retail sales payments jumped 7.6% during the critical holiday season from November 1 through Christmas Eve.

Consumer spending is predicated on job growth, and the December nonfarm payroll report pushed the unemployment rate down to 3.50%, adding 223,000 jobs. U.S. household wealth fell in the third quarter to \$143.3 trillion for the third consecutive quarterly loss.

Rising inflation is cutting into consumer discretionary spending, weighing heavily on the consumer and will likely fall further in subsequent quarters. The consumer discretionary sector continued to be among the worst of the big sectors in the S&P 500, declining –37.4% in 2022. There is likely more pain to come if the Fed keeps rates higher for longer in an elevated inflation environment.

Wages

The October 2022 U.S. Employment Cost Index (ECI) tracked consensus estimates with a 1.2% rise in 3Q. The year-on-year ECI gauge slipped to 5.0% from a 32-year high of 5.1% in 2Q. The most recent wage cost report from the December non-farms payrolls data showed a decisive drop in average hourly earnings to 4.6% year on year, from 5.1% in November. This is great news to potentially temper future FOMC rate increases.

Figure 5: Consumer as a gamechanger

As of 11/30/22. Source: FactSet.

Market Review Summary, 2022

It was the worst year for U.S. stocks since 2008 as the FOMC slammed the brakes on runaway inflation. But it was the 2022 bond market shock that shook the world with the worst bond bear market since the Volker Era, worse than the Great Bond Massacre of 1994. The pain inflicted was widespread as U.S. Treasuries, high-grade corporates, global bonds and high-yield bonds all experienced double-digit losses. In other words, there was no place to hide in 2022.

The S&P 500's -18.1% nearly matched the MSCI Emerging Market's -19.7% return. The S&P Midcap and S&P Small cap stocks fell -13.1% and -16.1% respectively. The worst performing equity was Global REITs at -24.4%. U.S. Treasury 20+ year bonds returned -31.1%; U.S. Corporate Investment Grade returned -15.8%; Global Bonds returned -16.2%, and the best-performing category was surprisingly High-yield Bonds, returning -11.2%. The CBOE volatility index closed at 21.7% and the S&P GCSI commodity index was up 26%, led by the S&P GCSI Energy sector, up +42.3% for the year.

Conclusion for 2023

Our outlook is predicated on the tug of war between a hawkish Fed and a resilient private economy. The “Fed put” has expired — for the first time in 20 years, the markets are on their own, without the safety net that the Fed will step in and backstop investors’ overzealous risk-taking. The good news is that the private economy should be able to take an inflation hit.

The most optimistic outlook is that upcoming inflation data will be significantly lower than expected, and there are signs it may be. A slowdown in inflation would normally put the Fed on pause, but a halt in rate increases is anything from certain, in part because there is also a very real concern that Congress will continue to spend aggressively. The current \$1.65 trillion Omnibus Bill represents a 9% increase over FY2022. Some believe that 2022

was a year of “negative surprises,” so 2023 may be a year of “positive surprises.”

As we enter 2023, income and dividend yields are at their most attractive levels in more than a decade. Valuations have normalized significantly, especially in the most speculative parts of the market. Illiquidity risk is decelerating from a lofty level, lowering the probability of a Black Swan event. And currency risk will be lower as the U.S. dollar index has climbed down from its peak. These factors are all potential pluses for investors, but pay attention to Voya Global Perspectives’ catch phrase coined in November 2010 regarding “the folly of gaming diversification” and make sure your portfolio is truly diversified.

Disclosures

General investment risks: all investing involves risks of fluctuating prices and the uncertainties of rates of return and yield inherent in investing. All security transactions involve substantial risk of loss. Diversification does not guarantee a profit or ensure against loss. The S&P 500 index is a gauge of the U.S. stock market, which includes 500 leading companies in major industries of the U.S. economy. The S&P MidCap 400 Index is a benchmark for mid-sized companies, which covers over 7% of the U.S. equity market and reflects the risk and return characteristics of the broad mid-cap universe. The S&P SmallCap 600 index covers approximately 3% of the domestic equities market and is designed to represent a portfolio of small companies that are investable and financially viable. The FTSE EPRA/NAREIT Global Real Estate index is designed to represent general trends in eligible real estate equities worldwide. The MSCI EAFE index is a free float-adjusted market capitalization weighted index designed to measure the developed markets’ equity performance, excluding the U.S. and Canada, for 21 countries. The MSCI Emerging Markets index is a free float-adjusted market capitalization index that measures emerging market equity performance of 23 countries. The Bloomberg U.S. Corporate Bond index is a component of the Bloomberg U.S. Aggregate index. The Bloomberg U.S. Aggregate index is composed of U.S. securities in Treasury, government-related, corporate and securitized sectors that are of investment-grade quality or better, have at least one year to maturity and have an outstanding par value of at least \$250 million. The Bloomberg U.S. Treasury 20+ Year index tracks the performance of U.S. dollar-denominated, fixed-rate, nominal debt issued by the U.S. Treasury with 20 or more years to maturity. The Bloomberg Global Aggregate Bond index measures a wide spectrum of global government, government related, agencies, corporate and securitized fixed-income investments, all with maturities greater than one year. The Bloomberg U.S. Corporate High-Yield Bond index tracks the performance of non-investment grade U.S. dollar-denominated, fixed rate, taxable corporate bonds including those for which the middle rating of Moody’s, Fitch, and S&P is Ba1/BB+/BB+ or below, and excluding emerging markets debt. The S&P 500 Value index tracks the performance of the subset of S&P 500 stocks classified as value style, as measured by three factors: the ratios of book value, earnings and sales to price. The S&P 500 Growth index tracks the performance of the subset of S&P 500 stocks classified as growth style, as measured by three factors: sales growth, the ratio of earnings change to price and momentum. The CBOE Volatility index (VIX) is a real-time index that represents expectations for the relative strength of near-term price changes of the S&P 500 index. The S&P GCSI index is a benchmark commodities index that tracks the performance of the global commodities market. It is made up of 24 exchange-traded futures contracts that cover physical commodities spanning five sectors.

2023 Cost of Living Adjustments Announced

On October 21, 2022, the Internal Revenue Service issued Notice 2022-55, providing for the following 2023 cost of living dollar limits:

<u>LIMIT</u>	<u>2023</u>	<u>2022</u>
Defined Benefit Plans The lesser of the maximum dollar limitation for annual benefits under defined benefit plans under Internal Revenue Code (IRC) Section 415(b)(1)(A) or 100% of the participant's average compensation for his high 3 years.	\$265,000	\$245,000
Defined Contribution Plan 415 dollar limit The lesser of the dollar limitation for annual additions under defined contribution plans under IRC Section 415(c)(1)(A) or 100% of compensation.	\$66,000	\$61,000
401(k)/403(b)/Existing SARSEP Elective deferral limit All elective deferrals (including designated Roth contributions) in a tax year made by a participant to a 401(k), 403(b) tax deferred annuity, simplified employee pension, and SIMPLE retirement plan are aggregated under IRC Section 402(g).	\$22,500	\$20,500
457 Deferral Limits The lesser of the limitation on vested contributions to 457 plans under IRC Section 457(e)(15) or 100% of includible compensation.	\$22,500	\$20,500
403(b) Catch-up limit The maximum available 402(g) elective deferral limit plus the special catch-up election for employees participating in a 403(b) tax deferred annuity who have had at least 15 years of service with an educational organization, hospital, home health agency, health and welfare service agency, church or convention or association of churches. <i>Note: The additional 403(b) special catch-up of up to \$3,000 per year cannot exceed cumulatively \$15,000 over the lifetime of the 403(b) participant.</i>	\$25,500	\$23,500
