

# 800 MHz JOC Meeting

April 18<sup>th</sup>, 2024

# System Status Update

Agenda Item #6

# System Status Update

- System Green
- Cyber Incident occurred April 2024
  - Brute Force attack was conducted against our firewalls to the new P25 System.
  - The firewall did their job, and locked everything down.
  - Remediation issued by L3Harris is to install Multi-factor Authentication (One Identity Defender for VIDA Networks)
  - Washoe County purchased the software, and discovered that once installed it affects the whole shared system, and it would lock out our partners.
    - We are currently waiting for NVE and NDOT to purchase tokens, prior to installation.
    - In the meantime we have locked down the ports facing the internet, and deactivated our Cisco VPN.
    - Meaning all call-outs are truck rolls until software is installed.

# Others Changes to be Aware of

- L3Harris told us there would be a **price increase effective April 2024**
  - NSRS partners are working with L3Harris on the new pricing. All existing quotes will continue to be honored.
- Claire Pender is no longer with L3Harris
- Our New Sales Representative is John Gallegos
