Maintenance Recommendations

- Consoles are reaching the age of 7-10 years
 - Dispatch centers should consider creating Maintenance programs within their budgets
 - WCRCS is recommending the purchase of New SDD's drive for the consoles for all dispatch centers:
 - Last 8 tickets with L3Harris TAC results in Hard drive replacements being recommended.
 - SSDs use NAND flash memory to store data. Over time, this memory can wear out, leading to data [corruption](#) and failure.
 - Most modern SSDs use wear-leveling algorithms to distribute writes evenly across the drive, which can help reduce wear's impact. SSD drive only fail at 1.6% versus the 7% failure rate of an HDD.
 - Other Maintenance Items include Dispatch Foot pedals, and Audio Jacks.
