BEON[®] MOBILE APPLICATION

Public safety, defense, federal and commercial agencies rely on Land Mobile Radio Push-to-Talk (PTT) capabilities as a primary means for transmitting secure, mission-critical voice communications.

BeOn extends the capabilities of an LMR network to smartphones, tablets and PCs—providing secure PTT communications far beyond the boundaries of regional radio systems, and opening up affordable PTT communications to new user groups.

- Can be installed on Phone/Tablet/PC
 - Windows device or computer, Cellular device Android and iPhone.
- Works anywhere you have good cellular coverage, or WiFi (internet)
- Plays back missed radio conversations
- BeON Application half the cost of Radio LID for System costs (System buy on costs).
