PREVIOUS ACTION & BACKGROUND

The Communications Center utilizes headset adapters manufactured by L3Harris Technologies to connect dispatcher headsets to the 6-wire jackbox interface used with the center’s radio and telephone console equipment. Several of the existing adapters have reached the end of their service life due to routine daily use and are experiencing wear that affects audio connectivity and reliability. Replacement of these adapters is necessary to maintain consistent and clear communication between dispatch personnel, field responders, and the public during emergency call handling and radio operations.
